Career summary

CS student with a versatile technical background spanning Full-Stack Development and AI. Proven ability to build scalable applications while integrating ML models to solve complex problems. Proficient in Python, SQL, and Django, with a strong focus on analytical thinking and technical documentation. Eager to contribute effectively in collaborative team environments.

Education

SB Jain Institute of Technology, Management and Research – Nagpur, India 2027
Bachelor of Technology, Computer Science and Engineering
CGPA: 8.02; Relevant Coursework: Data Structures Algorithms, Web Development, Database Management Systems, Software Engineering, Machine Learning, Bussiness Economics and Finance

Projects

Playfoliyo Apr 2026 – Sept 2026

- Built a sports-focused networking platform ("LinkedIn for Sports") connecting athletes, organizations, and event organizers.
- Developed a full resume builder enabling athletes to showcase certifications, achievements, and career highlights to organizations.
- Enabled organizations to create profiles and showcase their work, fostering athlete-organization connections and event discovery.

Rate limiting middleware security logger Aug 2026 – Sept 2026

- Built an enterprise-grade Express.js middleware security service for college Technical Assessment and Examination (TAE) systems.
- Monitors incoming API traffic and enforces configurable client rate limits, automatically blocking abusive IP addresses upon exceeding threshold limits.
- Logs security violations to an atomic JSON file database and provides an interactive cybersecurity monitoring dashboard and testing sandbox.

Disease Diagnosis Jul 2026 – Sept 2026

- Built an enterprise-grade, full-stack Clinical Decision Support System for medical imaging diagnostics, integrating multi-modal deep learning models to enhance diagnostic accuracy.
- Implemented Explainable AI (Grad-CAM) to visualize model decisions, increasing clinician trust in AI-assisted diagnosis.
- Automated clinical PDF report generation, streamlining documentation and accelerating delivery of diagnostic results.

IT Help Desk (Salesforce CRM) Jul 2025 – Oct 2025

- Improved problem resolution by designing and implementing an automated IT Help Desk system within Salesforce CRM, streamlining internal support ticket handling.
- Leveraged Flow Builder and Email-to-Case to automate ticket assignment, reducing manual processing time by 40%.
- Created custom reports and dashboards to visualize ticket volume, resolution times, and team performance.

Technical Skills

Development: MERN Stack (MongoDB, Express.js, React, Node.js), Django, Python, Java, C, Agile
AI & Data Science: Agentic AI (LLMs, Prompt Engineering), Machine Learning (DS/ML), Data Manipulation (Pandas, NumPy)
Cloud & CRM: Salesforce Administration, Salesforce Security Models, Workflow Automation
Databases: NoSQL (MongoDB), Relational (SQLite, PostgreSQL)
Engineering Tools: Git/GitHub, VS Code, Jupyter, Technical Documentation

Achievements & Leadership

Volunteer – IEEE Student Branch, SB Jain Institute of Technology 2024 – 2025 | Nagpur

- Coordinated with 10+ speakers and 100+ participants to ensure smooth event execution.

Media Head – Computer Society, SB Jain Institute of Technology 2025 – 2026 | Nagpur

- Managed content creation including photography, videography, and social media posts.
- Collaborated with event organizers to capture and highlight key moments, boosting event visibility and participation by 30%.

Participant – College & Inter-college Hackathons
